

Water-Based Ink Wash

An aqueous, biodegradable washing solution suitable for plastisols, all UV inks (including water-based), and some poster ink and enamels. Its mild formulation is compatible with solvent sensitive stencils such as QTX, 925WR, and CDF/QT Thick-Films.

A balanced viscosity provides for an economical and easy-to-use product. Its low odor makes it especially suitable for manual screen cleaning.

INSTRUCTIONS:

- Remove excessive ink from the screen.
- Brush Water-Based Ink Wash on the stencil with a dry, long bristle nylon brush.
- Let stand for a few minutes.
- Rinse well with water.

HEALTH AND SAFETY INFORMATION: Water-Based Ink Wash is for industrial use only. Wear environmental protective rubber gloves and goggles during use. Water-Based Ink Wash is biodegradable in water treatment facilities.

PACKAGING: 1 quart=946 ml 1 gallon=3.785 liters
